

KRISHNA GURME | SOC ANALYST

CYBERSECURITY ENTHUSIAST

Phone: +91 9689295615 | Email: krishnagurme8888@gmail.com | LinkedIn | GitHub | Portfolio

EDUCATION

KJEI Trinity College of Engineering and Research, Pune, India <i>Bachelor of Engineering in Computer Engineering -- CGPA: 9.19 / 10</i>	2022 - 2026
Maharashtra Udaygiri College, Udgir, India <i>Higher Secondary Certificate (12th) -- Percentage: 85.20%</i>	2020 - 2021
Lal Bahadur Shastri Mahavidyalaya, Udgir, India <i>Secondary School Certificate (10th) -- Percentage: 84.60%</i>	2018 - 2019

TECHNICAL SKILLS

Operating Systems :	Windows 11, Kali Linux, Ubuntu, Windows Event Logs
SIEM & Monitoring :	Wazuh SIEM, Sysmon, Security Monitoring, Log Analysis, Alert Triage
Network & Protocols :	TCP/IP, DNS, DHCP, HTTP/HTTPS, SSH, ICMP, ARP, Network Troubleshooting
Tools & Technologies :	Wireshark, Nmap, Event Viewer, Process Explorer, ProcMon, TCPView, Autoruns, VirusTotal
Security Concepts :	Incident Investigation, Threat Detection, Malware Analysis, MITRE ATT&CK, Incident Response
Programming/Scripting :	PowerShell, Bash, Python (Basic)
Other Skills :	Git, GitHub, VirtualBox, Technical Documentation, Security Reporting

CYBERSECURITY PROJECTS & LABS

Enterprise-Style SOC Detection & Incident Response Lab	2026 - Present
- Built a hands-on SOC environment using Wazuh SIEM and Sysmon for Windows security monitoring and telemetry collection. - Developed and tested custom Wazuh detections with severity classification, MITRE ATT&CK mapping, Sigma rules, and false-positive reduction. - Performed alert triage, IOC extraction, log analysis, threat hunting, and documented investigation workflows.	
SOC Incident Investigation & Threat Hunting	2026 - Present
- Investigated simulated security incidents using Wazuh, Sysmon, Windows Event Logs, process telemetry, and network activity. - Performed IOC extraction, timeline reconstruction, process analysis, persistence investigation, and threat hunting to identify suspicious behavior.	
Detection Engineering & Threat Hunting Framework	2026 - Present
- Engineered six behavioral SOC detections using Wazuh and Sysmon covering PowerShell, command execution, suspicious processes, persistence, credential access, and network activity. - Developed Sigma detection rules and mapped security behaviors to MITRE ATT&CK while validating telemetry across Sysmon Event IDs 1, 3, 10, and 13.	

CERTIFICATIONS

- Cisco	-- Introduction to Cybersecurity
- IBM	-- Cybersecurity Fundamentals
- TryHackMe	-- Pursuing
- Fortinet NSE 1	-- Pursuing

ACHIEVEMENTS

- Built and documented an enterprise-style SOC Home Lab focused on security monitoring, detection engineering, threat hunting, and incident response.
- Developed and tested custom Wazuh detections with severity classification, MITRE ATT&CK mapping, Sigma rules, and false-positive reduction.
- Created a GitHub-based cybersecurity portfolio documenting practical SOC investigations, detection engineering, and security analysis.
